

EXL EXPRESS SURVEY: THE NEXT GENERATION OF COMMERCIAL SURVEYS

SOLUTION
SHEET

A NOVEL APPROACH

expressSurvey combines new data and technologies with current photographs to quickly and accurately assess commercial risk and validate coverage.

Innovation delivering value

Whether looking to identify poor risks or validate replacement cost limits, express Survey is a superior risk management and underwriting tool to quickly evaluate commercial risks. This innovative solution leverages proprietary and publicly available data, aerial imagery, current photos and risk assessment to deliver a comprehensive and actionable survey report.

A key expressSurvey innovation is to centralize the data compilation and analysis among highly trained, professional underwriting technicians. This approach enables more thorough analysis on each policy and results in exceptionally consistent and high quality surveys.

Faster turn-around time

With expressSurvey, you get results four times faster. You'll start receiving completed surveys within 48 hours, with an average turn-around time of only three to four days.

Taking underwriting action within the state mandated windows is clearly a business requirement, but quicker decision-making has other benefits. EXL's ultra-fast cycle time improves underwriter productivity.

Key Data

Building valuation system (BVS), real estate, local crime statistics, government records and current photos

Reduce survey spend by **40%**

Risk Scoring

for easy processing and decision-making

Accurate

risk and construction data verified by trained technicians

21st Century

solution and policyholder experience

Start receiving surveys in **2 days**

Impactful results

There has been much talk in recent years about “virtual” surveys supplanting traditional inspections. While data providers combining aerial imagery with proprietary data is intriguing, these solutions fall short compared to expressSurvey.

EXL outperforms the competition by utilizing current photographs, updated aerial imagery, trained underwriting technicians, and a superior quality assurance process resulting in our clients receiving accurate and relevant information that can be used to make impactful underwriting decisions.

Budget-friendly solutions

Surveys are priced an average of 40% lower than traditional inspections. This low pricing is enabled by our innovative integration of people, data and technology.
